Extension: GitLens — Git supercharged

GitLens — Git supercharged

GitKraken [gitkraken.com](#) | 52,957,306 | ★★★★★ (941)

Supercharge Git within VS Code — Visualize code authorship at a glance via Git blame annotations and CodeLens, seamlessly navigate and explore Git repositories, gain valuable insights via rich visualizations and powerful comparison commands, and so much more

Switch to Pre-Release Version Disable Uninstall Auto Update

DETAILS FEATURES CHANGELOG

GitLens — Supercharge Git in VS Code

Understand any line of code, keep every branch, worktree, and coding agent in view, and ship cleaner history — without leaving VS Code.

GitLens is an open-source extension built and maintained by GitKraken, and installed more than 51 million times.

Your repository moves faster than it used to. Coding agents open branches, worktrees pile up, and pull requests stack while you're still reading a diff. GitLens pulls all of it into one interactive view — history, working changes, branches, worktrees, and live agent activity together — then helps you review it, rebase it, and shape it into commits someone can actually read.

The image is a screenshot of the Visual Studio Code (VS Code) interface, specifically the Extensions view. The top bar shows the standard VS Code menu (File, Edit, Selection, View, Go, Run) and the current file name 'Portfolio_Building'. The left sidebar contains the Extensions panel, which is currently displaying the 'Prettier - Code formatter' extension. The main workspace area shows the details for this extension, including its icon, name, publisher (Prettier), and a list of supported languages (JavaScript, TypeScript, Flow, JSX, JSON, CSS, SCSS, Less, HTML, Vue, Angular, HANDLEBARS, Ember, Glimmer, GraphQL, Markdown, YAML). The right sidebar shows the 'Installation' and 'Marketplace' sections, which provide information about the extension's version, last updated date, size, and where it was published. The bottom status bar shows the current file is 'main*+' and the editor is in 'Debug' mode.

The image is a screenshot of the Visual Studio Code (VS Code) interface, specifically the Extensions Marketplace. The main focus is the 'Live Server' extension by Ritwick Dey. The extension's page shows its icon (a purple circle with radiating lines), name, author, download count (82,870,514), and a 4.5-star rating from 518 reviews. It is described as a tool to 'Launch a development local Server with live reload feature for static & dynamic pages'. The extension is currently installed, and the 'Auto Update' checkbox is checked. Below the extension details, there are tabs for 'DETAILS', 'FEATURES', and 'CHANGELOG'. The 'DETAILS' tab is active, showing a description in Hindi: '[Wanna try LIVE SERVER++ (BETA) ? It'll enable live changes without saving file. https://github.com/ritwickdey/vscode-live-server-plus-plus]'. There is also a section titled 'Live Server loves your multi-root workspace' with a link to 'Live Server for server side pages like PHP. Check Here'. Below this, there are several status badges: 'vscode marketplace' (retired badge), 'visual-studio-marketplace' (retired badge), '404 badge not found', 'appveyor branch' (passing), 'license' (MIT), and 'MIT'. At the bottom of the extension page, there is a preview image showing a web browser displaying a simple web page. On the left side of the interface, there is a list of other extensions, including 'Live Server (Five ...)', 'Live Server Previ...', 'Live Preview', 'XVBA - Live Ser...', 'html-live-server', 'php-live-server', and 'HQ Live Server'. On the right side, there is a 'Marketplace' section with fields for 'Identifier' (ritwickdey.liveserver), 'Version' (5.7.10), 'Published' (9 years ago), and 'Last Released' (7 months ago). Below this, there is a 'Categories' section with a button labeled 'Other'. At the bottom of the interface, there is a 'Resources' section with links to 'Repository', 'Issues', 'License', 'Ritwick Dey', and 'Marketplace'. The bottom status bar shows the current file is 'Portfolio_Building', the mode is 'Debug', and there are buttons for 'Live Share' and 'Go Live'.
